

CS-639 — Interaction Design Studio

Redesign Critique

Professor Bilge Mutlu

Today

- **Pod critique** (25 min) — share and critique within your pod
- **Class discussion** (15 min) — each pod shares their strongest insight
- **Reminders** (5 min)

In your pod, ask each other:

- Is the intelligent version **structurally different** — or just the traditional version with annotations?
- Is the intelligence **specific**? Can you describe exactly what the system does and when?
- What **new design challenges** did intelligence create?

The test: describe each version's flow separately. If the descriptions are the same, the shift hasn't happened yet.

Reminders

- **Assignment 1** due Monday, March 9 — all components on Canvas
- **Reading for Week 8:** Parasuraman et al. (2000) — read before Monday
- **Next week:** Agency Spectrum — how much control should the system have?

Use the weekend for A1 finalization and the reading. See you Monday.
